Become a part of our team!

Paian IT Solutions GmbH

We are looking for a
Virtualisation/Infrastructure consultant (m/f)
to immediately and permanently join our team

---

with a focus on at least one of the following products:
» Microsoft Azure Infrastruktur-Dienste
» Microsoft Hyper-V with Sytem Center Virtual Machine Manager

Paian IT Solutions GmbH supports companies and public sector institutions with professional consultancy and innovative IT solutions, focussing on their getting started in the cloud. Based in our locations in Switzerland and Germany, Paian offers qualified consulting services in the areas of collaboration (Microsoft Office 365, SharePoint, Exchange, Lync etc.), infrastructure (Microsoft Azure, Hyper-V etc.) as well as mobile solutions (apiOmat Mobile Platform and Gateway). Paian's focal points are the manufacturing industries in the clusters automotive and energy as well as financial services and insurance providers.

Your Tasks Will Include:

» Supporting our clients in drawing up and implementing sustainable IT solutions, including specialist and technical analyses and the assessment of IT architectures
» Developing technical and IT concepts during different project phases, including the required depth of detail in order to implement and further develop business-critical systems. This includes the restructuring of IT core processes as well as IT product evaluation and selection
» Engaging in the IT project management and quality assurance, including the creation and supervision of project and resource schedules

You will possess the qualifications in line with the industry standard (professional training or university degree in computer science/information technology as well as work experience). However, we are also open to applications from ambitious lateral entrants. Additionally, you will have a sound knowledge of the areas Microsoft server operating systems, Active Directory's code of operation and technologies, server and client security, virtualisation (server, client, network and storage), monitoring of systems pertaining to these matters and fault analysis in the mentioned areas. Planning and constructing complex, highly-available virtual infrastructures should not pose a problem for you. Experience in Citrix Xen Server, Vblock and FlexPod is desirable.

Furthermore, you will be communicative and distinguish yourself by a high degree of flexibility, team spirit and reliability. You will persuade us with a proactive approach and commitment and you will have a very good knowledge of German and preferably English. We expect a willingness to travel.

Become a member of a highly-motivated and excellently-qualified team with an outstanding commitment to quality. You will find a pleasant work environment with challenging and versatile projects with both medium-sized companies and large, reputable enterprises as well as a demanding occupation within an innovation-savvy company. At the same time there will be sufficient room for your own ideas and the further development of your technical and personal qualifications. Paian offers you an appealing condition of employment, manifold trainings and further education possibilities, a modern infrastructure in beautiful office spaces as well as additional employee benefits such as a company car.

Interested?

We are looking forward to receiving your application!

Please send your application, including your desired salary, to:
